FOR IMMEDIATE RELEASE

STORM ROAD INFORMATION BULLETIN

8:45 a.m.

Oakland – Heavy storms have impacted Bay Area freeways, highways and bridges. Even though the majority of rain has subsided, motorists should continue to slow down and drive with additional caution. Caltrans crews are in the field clearing drains and debris and posting warning signs where possible.

Statewide road information is available at 1-800-427-7623. Visit 511.org or call 511 for current traffic conditions including incident information, traffic speeds and driving times.

Current road conditions for the Bay Area are:

Alameda

State Route 84 There is a high wind advisory for Dumbarton Bridge.

Contra Costa

All roads are being watched for flooding, mudslides, rockslides and potential trees and power lines down.

Marin

All roads are being watched for flooding, mudslides, rockslides and potential trees and power lines down.

Napa

All roads are being watched for flooding, mudslides, rockslides and potential trees and power lines down.

TRAFFIC ADVISORY

San Francisco

All roads are being watched for flooding, mudslides, rockslides and potential trees and power lines down.

San Mateo

State Route 85 There have been reports of flooding on the northbound State Route 85 at Moffett Blvd.

Santa Clara

State Route 35 Currently closed between Mt. Charlie Road and Hutchinson due to down power lines. Motorists are advised to expect delays and use alternate routes. Estimated time of opening is pending.

State Route 35 (SR-35) is currently closed in both directions at SR-9 due to downed trees and power lines. Motorists are advised to expect delays and to use alternate routes. Estimated time of opening is 1400.

Interstate 280

The northbound Interstate 280 (I-280) on ramp for Stevens Creek Blvd. is temporarily closed until Caltrans crews repair uneven pavement. The pavement is uneven due to erosion from rainfall.

Now Open

Solano

All roads are being watched for flooding, mudslides, rockslides and potential trees and power lines down.

Sonoma

All roads are being watched for flooding, mudslides, rockslides and potential trees and power lines down.
